(2.9mm)

Please note that this roller size (formerly exotic size) is not recommended for Hookbills; they may crush it onto their leg.

These 6 sizes available in: silver, red, blue, black, green, orange, yellow, or violet
Minimum order 25 bands, same size, same set-up These 6 sizes available either open or closed (split or seamless)
 Please note that some hookbills may manipulate and/or remove open bands; especially lovebirds, quakers and conures.
 They are able to re-open split bands or close them tighter against the leg, possibly causing injury.

All the above bands can be imprinted with up to four characters of your choice, the current year, your state abbreviation and a series of numbers. This is all optional unless required by regulations in your state. Note: the canary bands are so small that the state

abbreviation may or may not fit depending on what all is being imprinted. The minimum order of bands must have all the same initials, year and state; only the consecutive numbers will change in a set. The serial numbers on the stainless steel bands can run anywhere

from 000 to 999. On all the aluminum bands they can run anywhere from 0 to 9999. Please choose your exact sizes. We don't like to choose for you due to differing preferences and the varying sizes of birds.

L&M Bird Leg Bands, Inc.

Special Pliers For Applying Our Open Aluminum Bands

Available in 5 Sizes

Canary • Parakeet, Cockatiel
English Parakeet • Lovebird
Makes It Easy To Apply Bands

\$12.95 ea.

SYRINGES (Amber Color)

BAND SIZE GUIDE

This is only to be used as a guideline to help you decide.

Here are some suggestions as to which of our bands will fit each bird given below. If the type of bird you need to band isn't on this list, try to find one on the list with a comparable sized leg. **Please**, keep in mind, these are only suggestions. We accumulated this info by asking our customers what they have used on their birds. Each breeder has their own preference as to how they like the bands to fit. Some like them to fit loosely, others prefer a close fit. Birds of the same kind can vary and some breeders band a little later with a larger size than one that would fit at an earlier age. All this should be taken into consideration when choosing a size and this is also the reason why we cannot specify an exact size for each bird. Use your best judgement and decide what is best for your birds.

APPLICATION OF CLOSED LEG BANDS:

Place the band over the three long toes, pass it over the ball of the foot and slide band up leg to the hock. If the short hind toe won't release, ease the toe from the band with a pointed match or toothpick inserted between the toe and leg.

Roller Size (formerly exotic size)

Not recommended on Hookbills.

Note: The roller measures the same as the #9 but with a thinner wall.

When imprinted, stretches to approx. #9 1/2 size
